

Basalt

Basalt is the most widespread rock on our planet. Almost all oceanic deep seabeds consist of basalt.

Real basalt blocks formed from nature served as a template for the Basalt formliner. Therefore, walls made with this formliner look like a copy of real basalt. The formliner is often used for outdoor applications such as slope protection or bridge piers.

Mat sizes

Article number	569315
Weight	44.00 kg/m ²
Mat thickness	40 mm

A	3580 mm	3580 mm
B	1460 mm	1680 mm

Dimensional tolerances

A/B	± 1.00 %
Mat thickness	± 2.00 mm
Shore Hardness A	65-70
Heat resistance	+ 80.00 °C
