

THE FORMWORK

NOE[®]tec

System formwork

NOEtec – made-to-measure for engineering and building structures

Made-to-measure

NOEtec can be exactly configured to suit your project and site requirements.

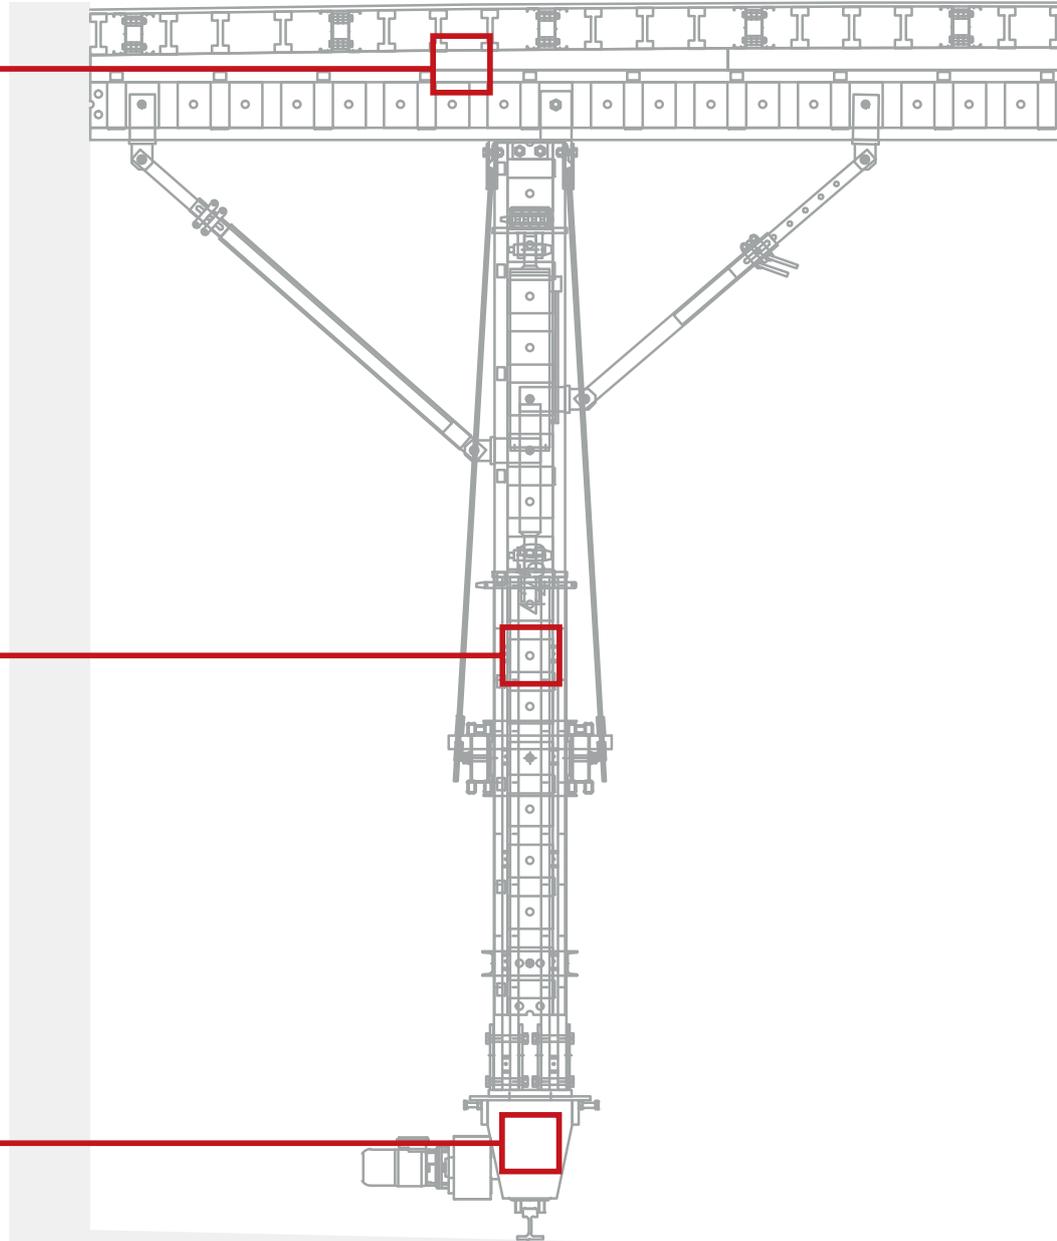

Small number of components

NOEtec completes challenging jobs using the minimum number of system components.

Versatile

NOEtec —the tried and tested, universally applicable beam formwork and scaffolding system for engineering and building structures.

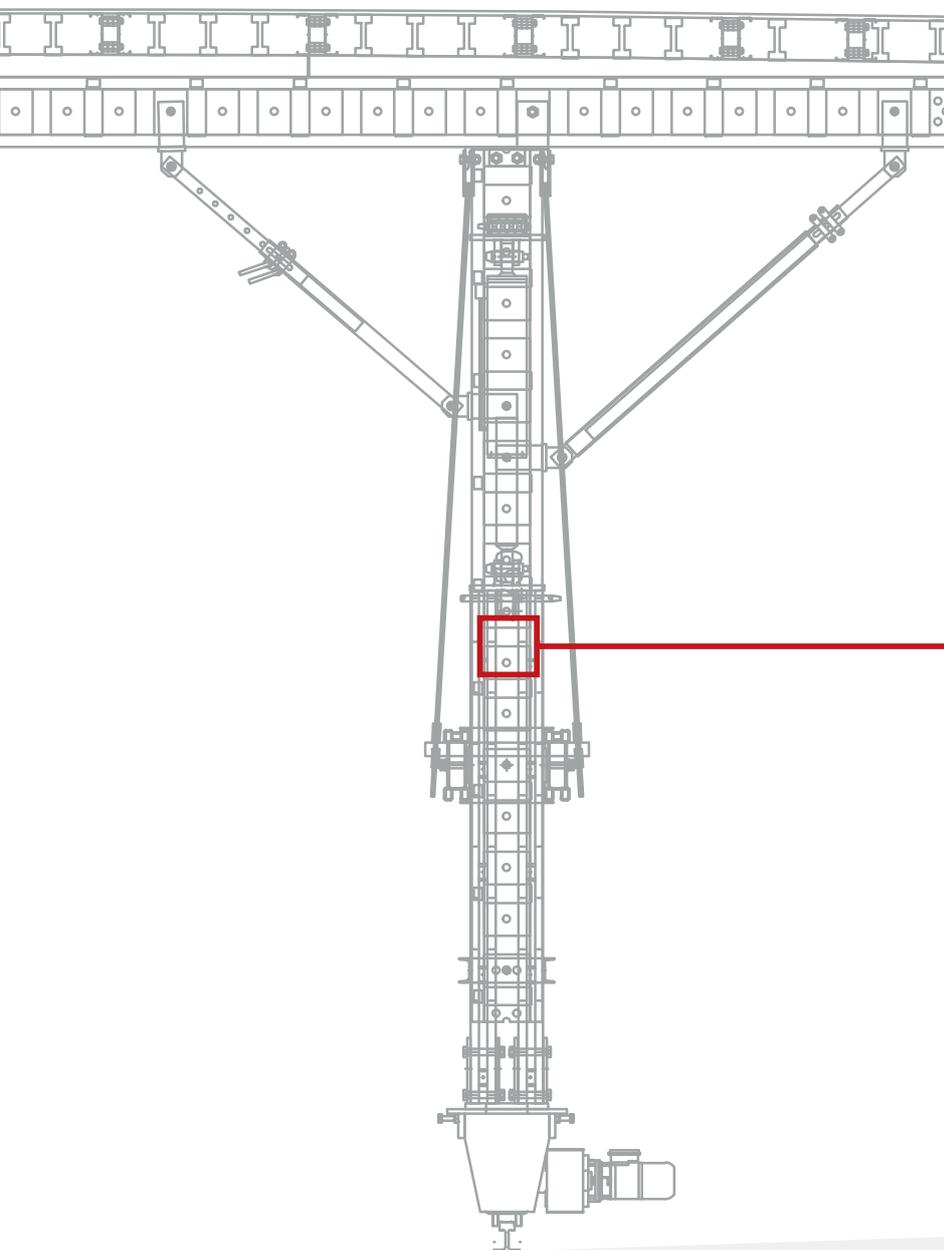

System components only

Whether it is a tunnel with a rectangular or rounded cross-section, traditional tunnelling or cut-and-cover construction, wall formwork or a shoring system: every project can be built almost completely using system components only.

NOEtec – complex projects simply accomplished

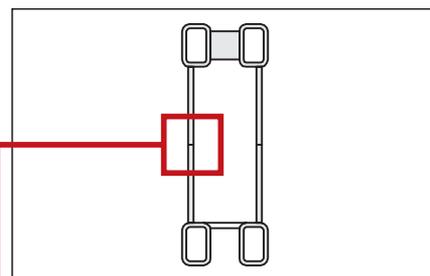

Safe

NOEtec excels through its high load capacity.

Quick

NOE impresses with its short assembly times and self-explanatory construction.

Durable

All system components are painted steel.

Strong

NOEtec excels through its high load capacity.

Structural properties:

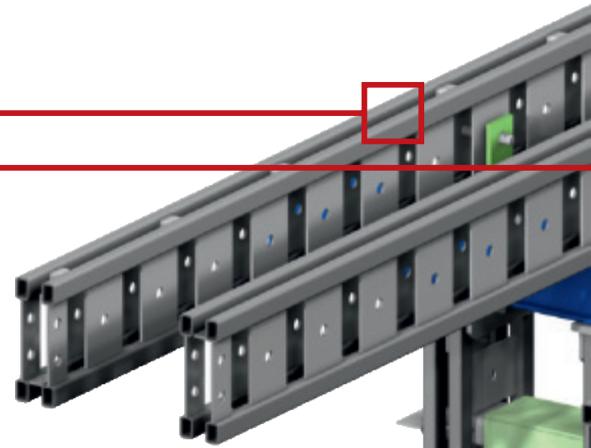

A =	42,69 cm ²
G =	50 kg/m
I _y =	8544 cm ⁴
M _{yzul} =	109 kNm
V _{yzul} =	349 kN

NOEtec – impresses with its clear, comprehensible construction

NOEtec girder

At the heart of the system

NOEtec bolt

Unique connector —the NOEtec bolt

NOEtec standard lock

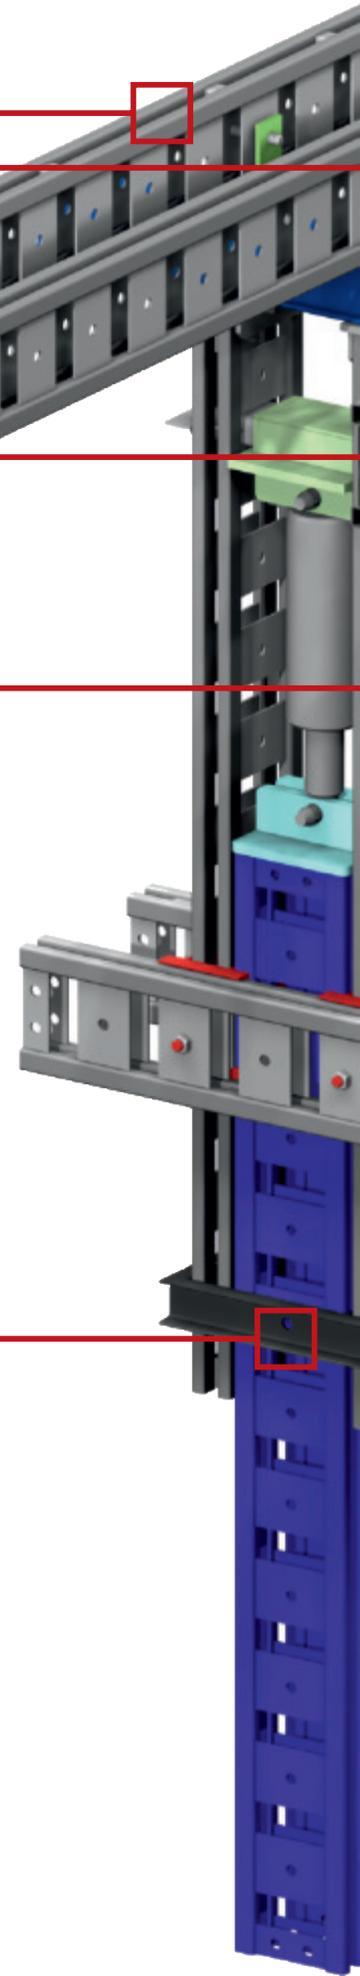

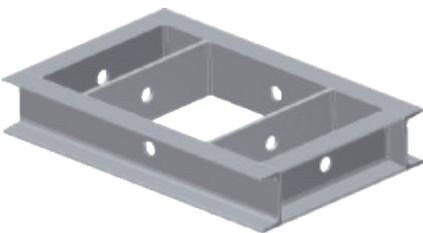

NOEtec strut

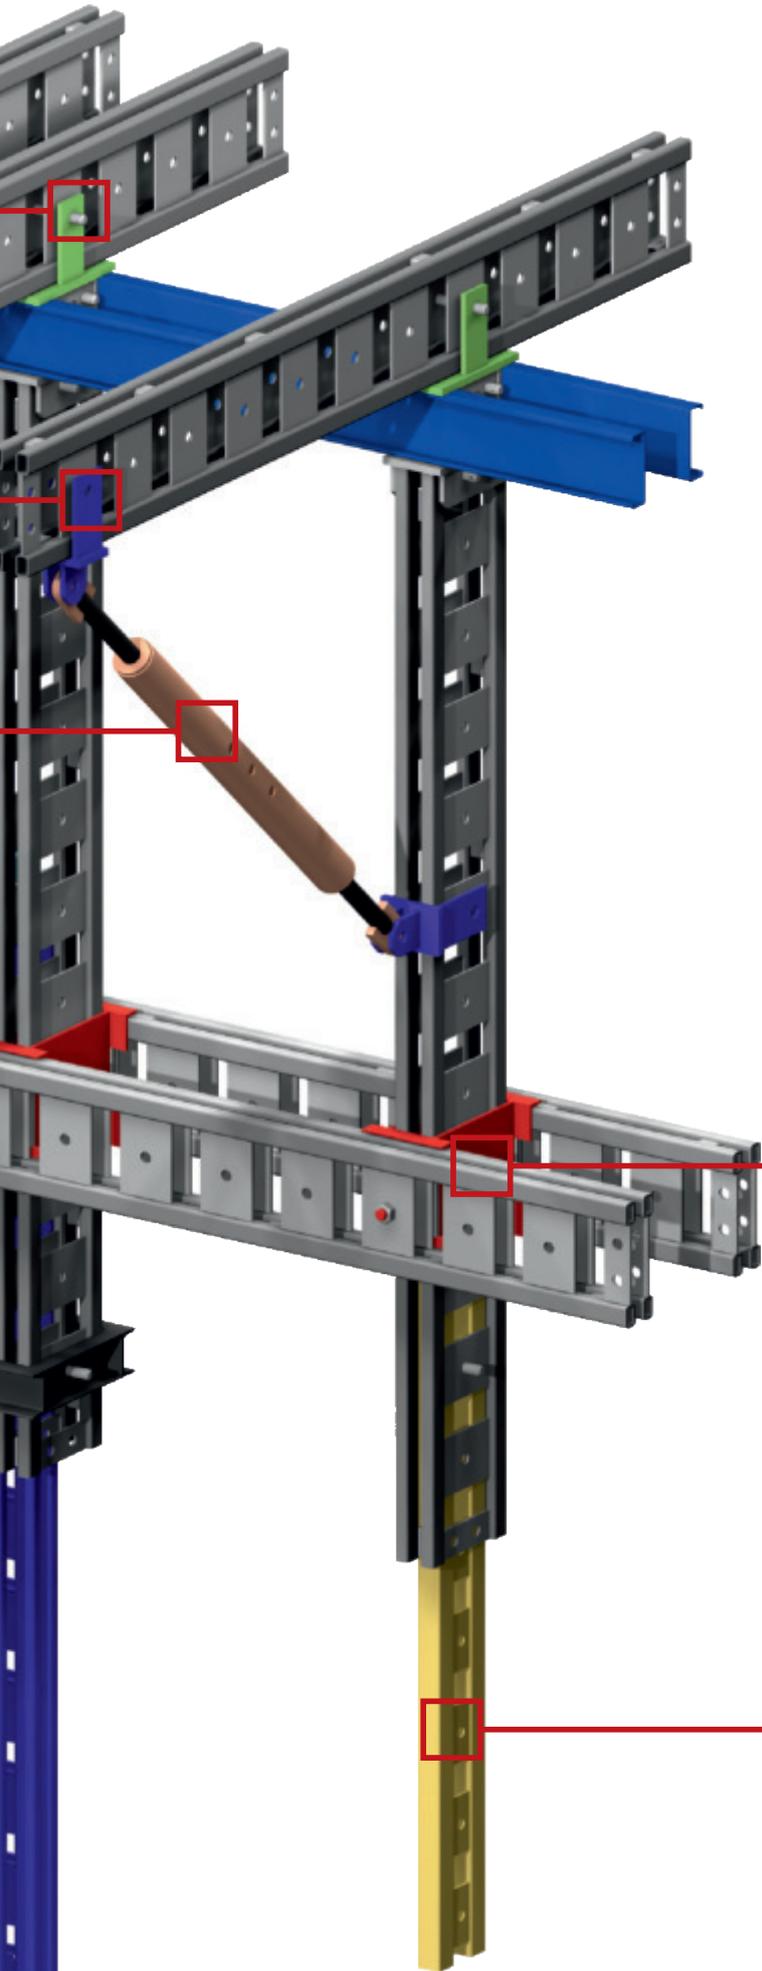

NOEtec collar

For telescopic travelling girder

NOEtec – impresses with its short assembly times

NOEtec guide pocket
for NOEtec travelling girder

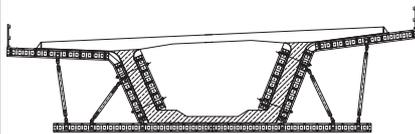

NOEtec extending girder

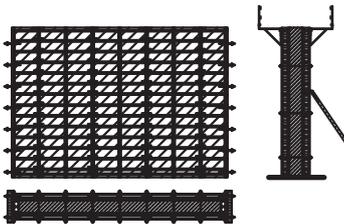

NOEtec – technically and economically impressive

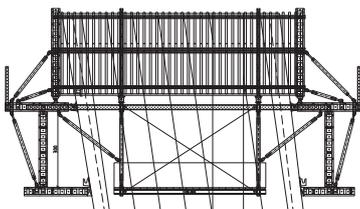

Use as articulating formwork

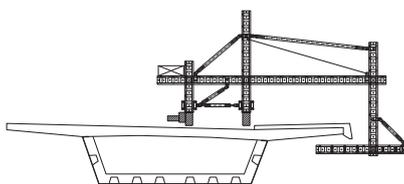

Use as wall formwork

Use as climbing formwork

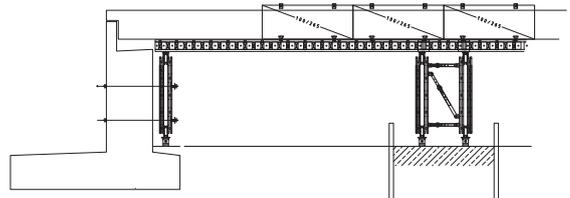

Use as box-section formwork

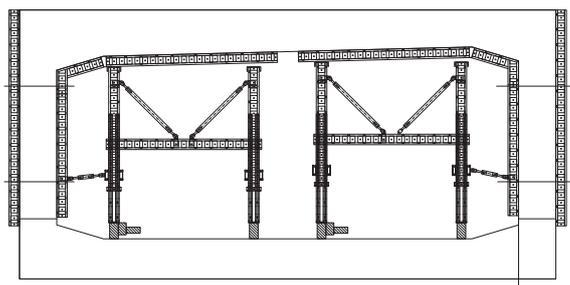

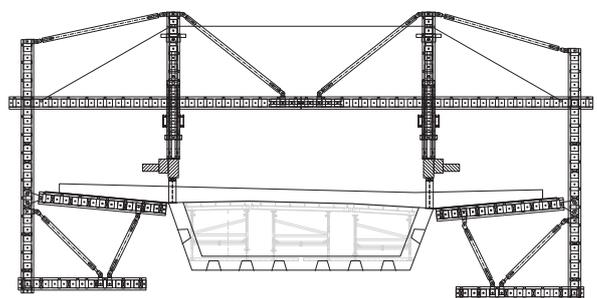

Use as centring soffit formwork

Use as tunnel formwork

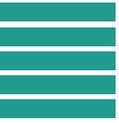

Use as integrated travelling formwork
