

This textured formliner is really something quite special. It does not simply form a texture on the surface of the concrete. Instead, hard-fired clay bricks are placed into it and the concrete cast on them. This creates a durable connection between the concrete and the artificial stone. The finished panels are very suitable for facades where a traditional hard-fired clay brick appearance is required.

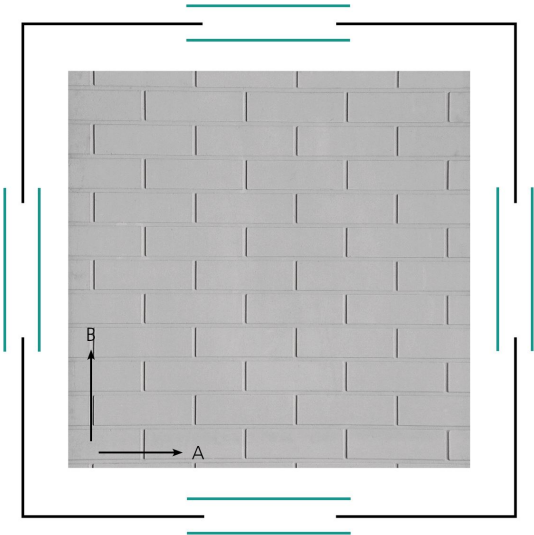

Only for inlaying bricks, liner does not produce a patterned profiled concrete finish.

Total thickness 16mm

Joint depth 10mm

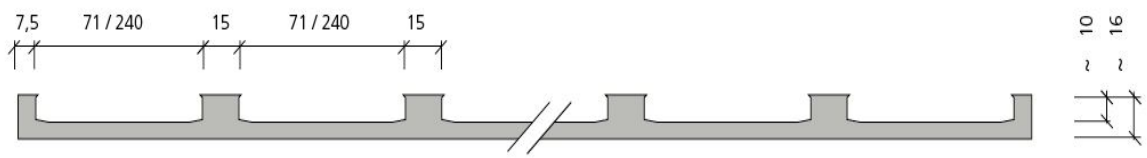

Mat sizes

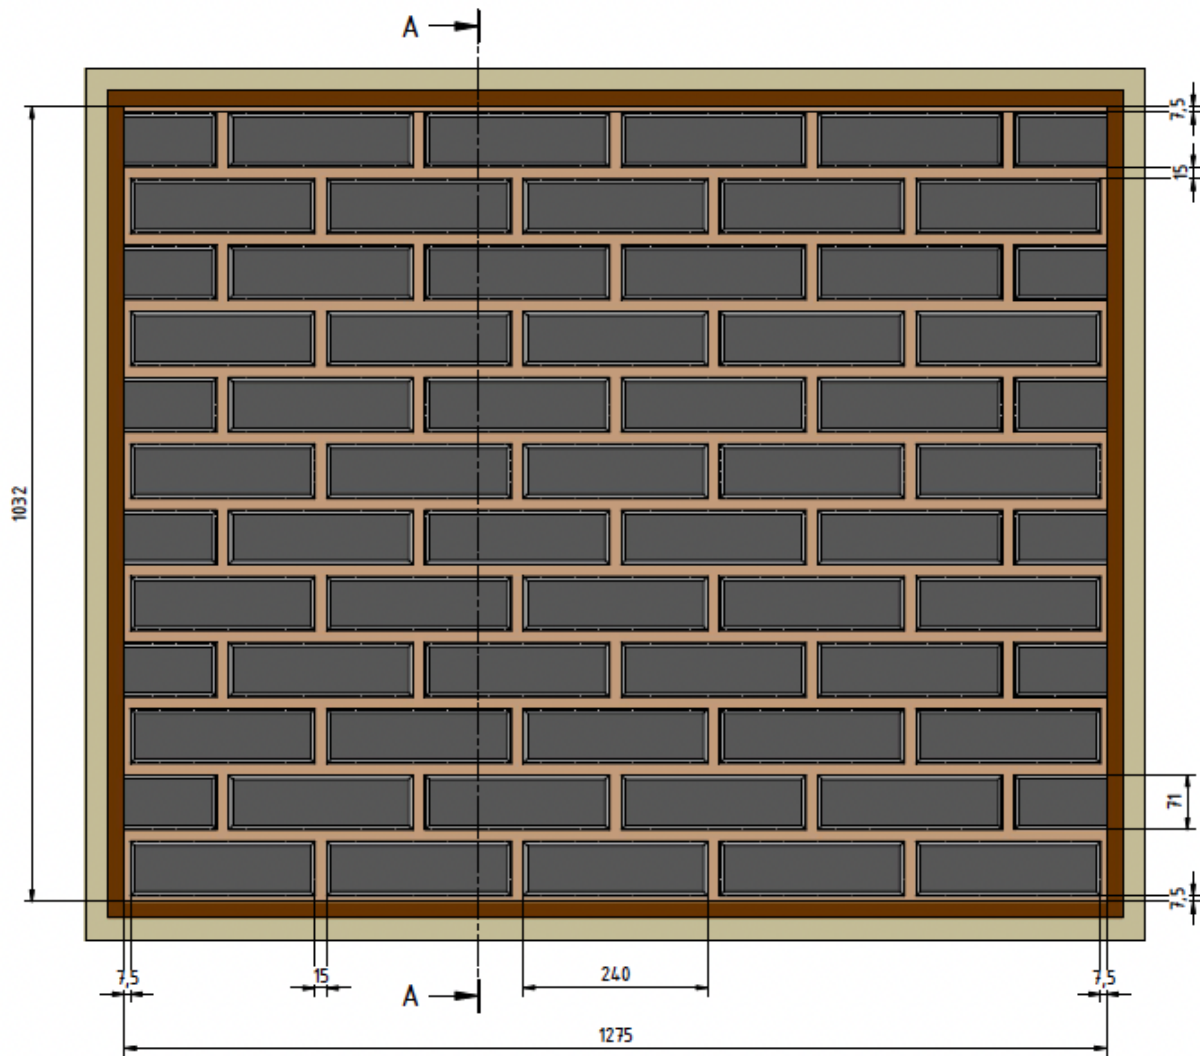

Article number	569333
Weight	13.00 kg/m²
Mat thickness	16 mm
A	1275 mm
B	1032 mm

Dimensional tolerances

A/B	± 1.00 %
Mat thickness	± 2.00 mm
Shore Hardness A	65-70
Heat resistance	+ 80.00 °C
