

This pattern was made from stones extracted from a quarry near Caen. This mould faithfully reproduces the surface of the Caen stone. The masonry bond typical of Normandy can also be found in other regions of France. This structure combines aesthetics and technique with the advantage that it can be toothed-out, so that a varied look can be achieved without unsightly joints.

Mat sizes

Article number	569339
Weight	25.40 kg/m ²
Mat thickness	34 mm

A	2500 mm
B	3000 mm

Dimensional tolerances

A/B	± 1.00 %
Mat thickness	± 2.00 mm
Shore Hardness A	65-70
Heat resistance	+ 80.00 °C
